

FLASH FORWARD INCUBATOR PROGRAM - Activity #3
Preliminary Image Submission

For this activity, participants submit a preliminary image for review by the Incubator team including the incubator mentors, educators, festival directors, professional photographers, and curators.

In this activity, participants will receive critical feedback for their final steps of creation and help to ensure that participants submit a successful final image for the program.

Feedback documents will appear in your folder with technical and artistic considerations, successes and next steps.

We do not expect your work to be complete and we appreciate work in all stages of creation. We do not expect all of our feedback to be integrated, but we do expect that feedback is considered. We are very interested in your work and are here to help and support you so please don't hesitate to reach out if you have any questions!

How do I submit my image?

To submit your preliminary image, please upload it into your Folder.

Preliminary images are reviewed by the incubator team. As opposed to the other activities, written feedback is co-created and uploaded to your folder for you to read and consider. If you have questions or concerns, you can always comment and send the comment with an @ sign to send a note to any of the incubator mentors.
