

REFLECTIONS AND REFRACTIONS

You have been provided with a selection of mirrors or reflective objects and lights. Arrange them in interesting and innovative ways to create repeats and complex refractions. Other elements may be included at your discretion, for instance if you wanted to take a portrait shot refracted through this strategy but it should be clear that the reflections and refractions are your subject. Work as a group or divide yourselves in smaller groups to play with this assignment but you must each submit your own photographs.

Submission: Create a Tumblr submission of between 4-8 photographs. Title it appropriately.
